### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Changed the status modifier of claim 21 from "Currently Amended" to -- Previously Presented --.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The applied prior art to Yoo does not disclose or suggest the claimed process for selective dehydrogenation of 1,3-butadiene to primarily cis-2-butene, said process comprising contacting a feed containing 1,3-butadiene with a liquid catalyst comprising at least one metal salt, at least one ligand and at least one organometallic reducing agent as recited in claim 1. Yoo discloses heterogeneous catalysts, i.e., solid phase, which is not the same as claimed homogeneous catalyst, i.e., liquid phase. Although liquid catalysts are disclosed in the examples of Yoo reference (Examples XXVI, XXX, XXXIII and XXXIV), these examples disclose hydrogenating monolefins to alkanes. Yoo further shows a comparative result of hydrogenating 1,3-pentadiene to primarily pentane using a supported catalyst versus unsupported catalyst (Examples V and VIII) wherein a superior result was obtained with a supported catalyst over the unsupported catalyst

(col. 14, lines 14-20). Also, see Pre-Appeal Brief, page 2, line 13 to page 3, line 7, with a particular attention to the discussion directed to a comparison of heterogeneous catalyst to the claimed homogenous catalyst; the claimed homogeneous catalyst has much higher activity and selectivity for cis-2-butene than the heterogeneous catalyst (instant specification, Table 4).

U.S. Patent 3,865,893 to Thatcher discloses a homogeneous catalyst similar instant claimed invention. However, Thatcher discloses using the homogeneous catalyst to hydrogenate unsaturates including dienes to saturates which is different from the claimed hydrogenation of 1,3-butadiene to primarily cis-2-butene.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to IN SUK BULLOCK whose telephone number is (571)272-5954. The examiner can normally be reached on Monday - Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
